"EView Manger boosts our security through intrusion detection"

I am a Happy Customer...™

Organization:

Highline

Industry:

Automotive

Product:

eView Manager

Application:

Intrusion Detection, Loss Mitigation

Customer Needs

Having an outstanding inventory of high-end vehicles, Highline enjoys a large network of repeat customers. When Highline expanded their operation to accommodate a growing customer base, they moved into their ultimate sales and service facility. From the beginning, Highline facilities were designed to be flagship stores, each having an inventory of comprehensive and high end vehicles. Highline's primary concerns were protection against vandalism, vehicle theft, theft of parts, lot damage and fraud. Highline required a surveillance system that was easy to use, and maintain providing high quality video images that could be used for possible audit trail or by authorities to prosecute

Benefits:

- Identify suspicious activity
- Recording of events and security incidents, providing a comprehensive record 24x7x365
- Record vehicle license plates
- Unified viewing of live events and recorded video across multiple sites
- Prevent fraudulent liability claims
- Zoom in and track individuals on the premises
- Identify un attended customers
- Employment of security surveillance lowers insurance costs

The eView Solution

eView engineers designed a powerful, user friendly, scalable video surveillance solution that enables viewing live and recorded high-resolution video images from each location at a central facility, day or night. Captured images can be printed and/or copied to storage media, such as CD-ROM, DVD-R, or local network drives. All stored images are "watermarked" for use as evidence in court. As Highline's business continues to grow, the system can be easily expanded to integrate the new locations with only minor modifications. Additional services, such as 24 hour security monitoring of the premises with two-way audio communication and business metrics are also available and can be easily added, as needed.
