eView Technologies Announces New Product eView Manager

eView Manager Enables Digital Video Surveillance Security for Microsoft Windows Platform

WASHINGTON, DC (July 14, 2005)... eView Technologies, a Security Automation Management company providing intelligent video surveillance technologies, today announced eView Manager Version 2.01 in a major mid year product launch aimed at strengthening its growing product assortment. Effective immediately, eView Manager Version 2.01 will now be available.

"eView Manager 2.01 is our answer to increasing market demand for Intelligent Video Surveillance Security products. eView Manager is user friendly, scalable, customizable, and combines security with productivity," said Kevin Shahbazi, eView Technologies' President and CEO. "With this new product, eView Technologies is establishing the way toward successful implementation of large-scale Digital Video Surveillance solutions that enterprise deployments require."

eView Technologies product suites have a combination of hardware, software, systems, and networking technologies with the primary purpose of performing multiple security and productivity functions. eView Technologies offers one unified solution to look at the entire business, no matter how many different and remote operating centers one may have. eView Manager Version 2.01, automatically identifies objects, detects motion and reports anomaly to a desired or predefined equipment, email address, pager, cell Phone and or a mobile PDA device.

"Some of my past experiences involved leading enterprise-grade products and capturing customer confidence. We are positioned to accomplish the same at eView Technologies with reliable, innovative products and extensive customer care and service," said Kevin Shahbazi, eView Technologies' President and CEO. "eView Technologies unites security with productivity."

eView Technologies offers innovative security and productivity products for clients who desire to improve their security and IT infrastructure, to enhance their customers' experience, and in turn, dramatically improve their own bottom line. The eView Manager product line from eView Technologies, delivers an entirely new level of security and process management that introduces science into the digital video surveillance security technology. eView Technologies products suite protects against internal fraud and theft, sabotage, malicious acts and legal exposure. It also helps an organization to enjoy the same protection outside their physical boundaries. eView Manager is also designed to work with camera stacks from a vast array of manufacturers. Specific features and functions can be studied in detail at the eView Technologies web site (<http://www.eViewTechnologies.com>).

About eView Technologies

Confidently helping organizations protect their enterprise, eView Technologies develops, markets, and supports an integrated digital video surveillance security and productivity suite. During the past two decades and prior to founding, eView Technologies' founder and executive management team have earned a global reputation for innovative, standards-based, security solutions and have captured numerous national and international industry awards. As an Independent Software Vendor (ISV), eView Technologies' security suite includes a wide range of products, productivity solutions, cryptographic and e-security applications. eView Technologies markets and sells its solutions worldwide directly and through the channel, and a wide variety partners.
