## **eView Technologies Introduces New CCTV Cameras to Complement It's Video Surveillance Security Offerings**

*eView's High Resolution Cameras Capture Video Images in Digital Format Which are Recorded by  
eView Manager Software*

WASHINGTON, DC (October 10, 2005)... eView Technologies, a Security Automation Management company providing intelligent video surveillance technologies, today announced release of 4 new CCTV cameras to enhance it's already existing rich offerings. eView Technologies new suite of cameras provide a combination of Color, High Resolution, SUPER HAD CCD, 420 to 600 TV Lines, with minimum light requirements of 0.01LUX. Camera selections include Day/Night or Infrared with variety of lens and zoom magnifications, enabling to support various applications in commercial enterprise, retail or DoD. eView Manager software captures video surveillance images through eView Cameras, which are recorded in digital format.

"Introduction of our new line of high end CCTV cameras represents a significant milestone in eView Technologies' commitment and continuing development of products to meet our customers' video surveillance needs," said Kevin Shahbazi, eView Technologies' President and CEO. "There's been a tremendous upside in market motivation, and customers are seeking high resolution cameras to manage emerging threats. eView Technologies products will help our enterprise customers millions of dollars, both in expense and in lost revenue by preventing theft."

eView Manager 2.01 is eView Technologies' product in the rapidly growing digital video surveillance security market. eView Technologies product suites offer a combination of hardware, software, systems, and networking technologies aimed at performing multiple security and productivity functions. eView Manager automatically identifies objects, detects motion and reports anomalies to desired or predefined equipment, email address, pager, cell phone or a wireless PDA. In a typical application, eView Manager

captures images of the subject through a video camera, which can be monitored and viewed locally or remotely via Microsoft Internet Explorer (IE).

### **About eView Technologies**

Confidently helping organizations protect their enterprise, eView Technologies develops, markets, and supports an integrated digital video surveillance security and productivity suite. During the past two decades and prior to founding, eView Technologies' founders and executive management team have earned a global reputation for innovative, standards-based, security solutions and have captured numerous national and international industry awards. As an Independent Software Vendor (ISV), eView Technologies' security suite includes a wide range of security products, productivity solutions, cryptographic and e-security applications. eView Technologies markets and sells its solutions worldwide directly and through the channel, and a wide variety of partners.
