eView Technologies Announces CCTV Perimeter Security Customer Win

Company to install and support campus-wide CCTV security system operating on Microsoft Windows Platform

WASHINGTON, DC (April 4, 2006)...eView Technologies, a Video Surveillance Security and Automation Management company providing intelligent video surveillance technologies, today announced a major customer win from one of the oldest businesses in the state of Maryland. The company will install and support a complex CCTV perimeter security system throughout the client's campus, which includes multi-housing units and support facilities.

eView Technologies signed a contract to provide complete CCTV video surveillance security products to ensure building and perimeter security aimed at improving security personnel functionality and response time, increasing customer service and preventing unwanted incidents across the campus.

"eView Technologies has a simple strategic approach. We have built video surveillance security products with both the horsepower and affordable price points required by the market," said Kevin Shahbazi, eView Technologies' President and CEO. "Additionally, eView Technologies provides one unified solution and takes away the pain associated with most traditional video surveillance software systems implementations."

eView Technologies product suites have a combination of hardware, software, systems, and networking technologies with the primary purpose of performing multiple security and productivity functions. eView Technologies offers one unified solution to monitor the entire business, no matter how many diverse remote operating centers the organization may have. eView Manager Version 2.5, the "brains" behind the security system, automatically identifies objects, detects motion and reports anomalies to a desired or predefined equipment, email address, pager, cell phone and/or PDA device with wireless communications capabilities.

"We are proud to welcome customers who are icons in their own industries," said Mr. Shahbazi. "Companies of all shapes and sizes have realized the importance of the video surveillance security management's role in today's business environment, and have relied upon eView Technologies' modular and scalable enterprise solution, with convenient implementation and ease of use."

eView Technologies offers innovative security and productivity products for organizations that desire to improve their security and IT infrastructure, enhance their customers' experience, and in turn, dramatically improves their own bottom lines. The eView Manager delivers an entirely new level of security and process management that introduces science into the digital video surveillance security technology. eView Technologies' suite protects against internal fraud and theft, sabotage, malicious acts and legal exposure. It also helps an organization to enjoy the same protection outside their physical boundaries. eView Manager is designed to work with camera stacks from a vast array of manufacturers. Specific features and functions can be studied in detail at the eView Technologies web site, www.eviewtechnologies.com.

About eView Technologies

Confidently helping organizations to protect their enterprise, eView Technologies develops, markets, and supports an integrated digital video surveillance security and productivity suite. During the past two decades and prior to founding, eView Technologies' founders and executive management team have earned a global reputation for innovative, standards-based, security solutions and have captured numerous national and international industry awards. As an Independent Software Vendor (ISV), eView Technologies' security suite includes a wide range of products, productivity solutions, cryptographic and e-security applications. eView Technologies markets and promotes its solutions worldwide directly and through a wide variety of partners.
