eView Technologies Launches Web Based Single Sign-On Users Access for Popular eView Manager Software

eView Technologies Makes Secure Access to Video Surveillance Camera Infrastructure Easier, by Enabling Centralized Web Based Authenticated User Accounts

WASHINGTON, DC (August 18, 2006)...eView Technologies, a Video Surveillance Security and Automation Management company providing intelligent video surveillance technologies, today announced that their clients with video surveillance security applications running on Microsoft platform can now access their cameras, remotely, and /or over the Internet, through eView's centralized web account. For the first time, organizations using security cameras and Microsoft platform not only can centrally manage user authentication across a wide range of heterogeneous systems and web-based security cameras, but also control access for all security administrators. Security administrators and users within the organization benefit by gaining single sign-on access to all of the security cameras and systems, applications and databases they require access to, no matter how heterogeneous their organization's underlying IT infrastructure could be.

"Companies face a common challenge of helping their managers and security staff communicate and share information more effectively," said Kevin Shahbazi, eView Technologies' President and CEO. "eView Technologies' hosted service via eView's centralized website eliminates many of the hassles and expenses of maintaining a communications infrastructure, which is welcome relief for many small business owners and IT staffers. Organizations can enjoy eView's centralized web based single sign-on users access for all users, including account management and secured access".

Trend signal is a growing need for online user access. As a hosted service, eView Manager single sign-on is available worldwide, through eView's website. eView Technologies is currently working to make the service available to security administrators with more advanced features and functionalities. Web-based single sign-on access is a convenient, efficient and inexpensive way to stay in touch with the entire security

infrastructure and organization's IT staff and to access security cameras and documents from anywhere in the world.

eView Technologies recently signed a contract with one of the oldest businesses in the state of Maryland-- nearly 120 years old - who has taken an ultra-modern approach to security. Company to provide complete CCTV video surveillance security products to ensure building and perimeter security aimed at improving security personnel functionality and response time, increasing customer service and preventing unwanted incidents across the campus. eView Technologies outfitted the company's campus with a CCTV perimeter security system that automatically identifies objects, detects motion and reports anomalies to an email address, pager, cell phone and/or PDA device with wireless communications capabilities.

eView Technologies' suite protects against internal fraud and theft, sabotage, malicious acts and legal exposure. It also helps an organization to enjoy the same protection outside their physical boundaries. eView Manager is designed to work with camera stacks from a vast array of manufacturers. Specific features and functions can be studied in detail at the eView Technologies web site, www.eviewtechnologies.com.

About eView Technologies

Confidently helping organizations to protect their enterprise, eView Technologies develops, markets, and supports an integrated digital video surveillance security and productivity suite. During the past two decades and prior to founding, eView Technologies' founders and executive management team have earned a global reputation for innovative, standards-based, security solutions and have captured numerous national and international industry awards. As an Independent Software Vendor (ISV), eView Technologies' security suite includes a wide range of products, productivity solutions, cryptographic and e-security applications. eView Technologies markets and promotes its solutions worldwide directly and through a wide variety of partners.
