eView Technologies Win 2006 With landmark New Customers, Security Products and Microsoft IE Support

eView Technologies bolstered its Industry Position with 40 New Customers, Successful Implementations and Integrations of Intelligent Video Surveillance Security

WASHINGTON, DC (January 9, 2007)...eView Technologies, a Video Surveillance Security and Automation Management company providing intelligent video surveillance technologies, today announced customer win and validations that during 2006 it has significantly increased its customer / install base. eView Technologies' 40 new customers demonstrate market traction for its eView Manager video surveillance and security software. The announcement comes as eView Technologies is making increasingly public moves to carve a legitimate place for itself in the mainstream digital video surveillance security industry.

"Companies choose eView Technologies products suite for its advanced security technology, rapid deployment, comprehensive training and ability to streamline our video mining and management process," said Kevin Shahbazi, eView Technologies' President and CEO. "eView Technologies' fantastic reputation, combined with our mature offering is highly complementary to our clients' existing IT infrastructure".

Propelling the company's growth is eView Manager intelligent video surveillance security software and advanced technology cameras suite. eView Technologies based its year-end assessment on customer service and loyalty scores from surveys conducted for the company. eView Technologies earned highest score for on-time delivery, implementation and overall video surveillance security solution performance.

Support for Microsoft Internet Explorer used to remotely access and view digital video surveillance information and images are originally enabled by eView Web Manager version 2.1. eView Technologies makes secure access to video surveillance camera infrastructure easier, by enabling centralized web based authenticated user accounts.

"Companies face a common challenge of helping their staff communicate and share security information more effectively. Our increased sales trend signals growing need for eView Technologies' video surveillance security products," said Kevin Shahbazi, eView Technologies' President and CEO. "We have enjoyed a fantastic 2006 capturing more than 40 new customers. Our 2007 mandate is also similar and based upon our grass route approach, year-to-date accomplishments, patent and trade mark applications, and an excellent culture of customer service".

eView Technologies' suite protects against internal fraud and theft, sabotage, malicious acts and legal exposure. It also helps an organization to enjoy the same protection outside their physical boundaries. eView Manager is designed to work with camera stacks from a vast array of manufacturers. Specific features and functions can be studied in detail at the eView Technologies web site, www.eviewtechnologies.com.

About eView Technologies

Confidently helping organizations to protect their enterprise, eView Technologies develops, markets, and supports an integrated digital video surveillance security and productivity suite. During the past two decades and prior to founding, eView Technologies' founders and executive management team have earned a global reputation for innovative, standards-based, security solutions and have captured numerous national and international industry awards. As an Independent Software Vendor (ISV), eView Technologies' security suite includes a wide range of products, productivity solutions, cryptographic and e-security applications. eView Technologies markets and promotes its solutions worldwide directly and through a wide variety of partners.
