**eView Technologies' Security Products Suite Successfully Thwarted  
Business Invasion and Robbery**

***Attempted Business Robbery and Invasion Was Thwarted by eView Technologies' security  
Products***

WASHINGTON, DC (March 7, 2007)...eView Technologies, a Video Surveillance Security and Automation Management company providing intelligent video surveillance technologies, today announced an attempted commercial business invasion robbery was thwarted successfully by eView Technologies' suite of security products. The announcement comes as eView Technologies is unleashing additional new security products to bolster it's comprehensive security products suite, and making increasingly public moves to carve a legitimate place for itself in the mainstream digital video surveillance security industry.

For organizations or security personnel worried about security and safety, whether it is physical security, access control or intrusion detection, eView Manager's video surveillance security suite brings that to a whole new level of capabilities. Once protected by eView Manager security products system, criminal intrusions, theft and vandalism attempts will be thwarted by on-site audible alarms and an instant alert to Security Manager's system or via SMS message to security personnel or select individual's mobile phone or PDA.

"eView Technologies is delighted to effectively serve our communities and provide real-time, comprehensive and effective security measures, while thwarting robberies and protecting individuals and their lives," said Kevin Shahbazi, eView Technologies' President and CEO. "The secret to prevention is to put all of the security measures out in the open so the potential intruders can discover them upon arrival. eView Technologies' complete design and comprehensive security suite were fundamental reasons on target de-selection and successfully thwarting the attempted robbery".

eView Technologies' suite protects against internal fraud and theft, sabotage, malicious acts and legal exposure. It also helps an organization to enjoy the same protection outside their physical boundaries. eView Manager is designed to work with camera stacks from a vast array of manufacturers. Specific features and functions can be studied in detail at the eView Technologies web site, [www.eviewtechnologies.com](http://www.eviewtechnologies.com).

### **About eView Technologies**

Confidently helping organizations to protect their enterprise, eView Technologies develops, markets, and supports an integrated digital video surveillance security and productivity suite. During the past two decades and prior to founding, eView Technologies' founders and executive management team have earned a global reputation for innovative, standards-based, security solutions and have captured numerous national and international industry awards. As an Independent Software Vendor (ISV), eView Technologies' security suite includes a wide range of products, productivity solutions, cryptographic and e-security applications. eView Technologies markets and promotes its solutions worldwide directly and through a wide variety of partners.
